adequate for outside use, not UV resistant)**

Cleaning and disinfection

Please do not use abrasive cleaner! For strong soils, we suggest to use a wet cloth with soap water. We
recommend "Schnell-Desinfektions-Reiniger" for disinfection and cleaning (1-liter-bottle: article-n.0.

800x221 / sprayer: article-no. 800x222).

In case of extreme persistent dirt, we suggest to use a cleaner for artificial leather 800x225. At the end remove the glossy wax with detergent and dry.
