

Durable Polyester Airtex Mesh (300g)

Available Colours:

Black

Red

Military

Olive

Royal

Grey

Anthracite

Product code: KBT12660-U163
Selected Colour: **Black**
Width: 140cm
Price: £9.99/mtr

Description:

Durable Polyester air tex Mesh (300g) is a type of fabric that is commonly used in various applications such as sportswear, outdoor gear, and industrial equipment.

This fabric is made from a blend of polyester fibres and is known for its durability, strength, and breathability.

Durable Polyester air tex Mesh (300g) is a heavyweight fabric that is made from a blend of polyester fibres. Polyester is a synthetic fibre that is known for its strength and durability. When combined with other materials, such as cotton or nylon, it can create a fabric that has a variety of useful properties.

The air tex Mesh weave used in the fabric creates a breathable material that allows air to circulate through the fabric. This makes it a great choice for sportswear and outdoor gear that needs to be able to withstand high levels of physical activity and sweat. The mesh also makes it lightweight and comfortable to wear.

The 300g weight of the fabric means that it is thick and strong, making it suitable for use in industrial applications. It can withstand heavy wear and tear and is resistant to abrasions and punctures. The fabric is also resistant to fading and shrinking, making it a popular choice for outdoor equipment and clothing that needs to withstand harsh weather conditions.

Applications of Durable Polyester air tex Mesh (300g)

Durable Polyester air tex Mesh (300g) has a wide range of applications due to its durability, strength, and breathability. Here are some of the most common uses for this fabric:

- **Sportswear:** The breathable mesh fabric makes it ideal for use in sportswear such as jerseys, shorts, and training gear. The fabric is able to wick away sweat and moisture from the skin,

keeping athletes cool and comfortable during high-intensity workouts.

- **Outdoor gear:** The strong and durable fabric is perfect for outdoor gear such as tents, backpacks, and hiking boots. It can withstand harsh weather conditions and resist abrasions and punctures.
- **Industrial equipment:** Durable Polyester airtex Mesh (300g) is commonly used in the construction industry for safety gear such as vests and helmets. The fabric's strength and durability make it a great choice for protecting workers in hazardous environments.
- **Home decor:** The fabric's breathability and resistance to fading make it suitable for use in outdoor furniture such as patio chairs and cushions. It can withstand exposure to sunlight and rain without losing its colour or strength.
