Description:

Extra long, extra fluffy, extra soft, faux-fur in jet black. Natural fur grows at different lengths, a thick base which keeps the animal warm then more hair grows further to create the smooth outer part of the coat. The first part of the fake fur at the base is the thickest. This part has fibres densely packed between 1 and 5 cm tall. Then there are fur fibres which reach up to 15 cm in length; these rest above the thick pile and create the long hair coat.
