Description:

Funky new lining fabric , now in stock!

100% smooth polyester lining fabric ideal for making a statement contrast with a plain coloured jacket or coat. The design on the fabric mixes clusters of messy style diamond shapes overlapping each other like an oversized snakeskin effect, along with a spray paint / splatter effect. The overall look is chaotic but fun. There are two versions of the fabric, one with a soft black background, one with a wine coloured background.

The black background uses shades of light and dark pink, jade and soft green, cornflower blue and white for the design. The wine background uses dark and light green, cornflower to light blue, touches of black and minimal white. Both fabrics have a strong retro look of late 80s early 90s and could be used for fancy dress, retro style clothing, displays or merchandising.
