Description:

Part of the new range of car trim flooring, this soft variety can also be used around the office for wall panelling, furniture and notice boards. The soft version has more flexibility than standard Car Trim, so you can cover corners and curves with ease. To make it even more useful, all of the shades of Soft Car Trim are available in a self adhesive form too. The material measures 3 mm in thickness.

If you plan on smarting up your van, lorry , or camper van, this material is a great idea. So easy to use, you just cut the shape you need with normal scissors and attach to the floor, walls, cupboards or panels using a staple gun or spray glue. If you don't want to fuss with either of those methods just opt for the self adhesive and save time and effort.
