Description:

Our 4oz waterproof fabric is one of our biggest sellers. It's proven to be a great all-rounder for indoor and outdoor work. Its uses range from industrial weather protection to arts and crafts! The weatherproofing and lightweight quality makes it ideal outdoor clothing. Rain macs, jackets sports wear, umbrellas and pet coats all benefit from this great waterproof fabric. Made from a densely knit of weave 100% polyester fabric the back of the fabric is coated with polyurethane (PU) and is inherently treated, this gives the fabric an excellent waterproof barrier against liquid.

Another reason the 4oz waterproof is so popular is the weight. Light enough to be portable, waterproof covers will be strong enough to withstand most weather conditions so you can fold up and carry 4oz sheets around. The fabric weight is light enough to hang on rails, splash proof curtains for the home and creative work can be raised without any damage to rails or walls. 4oz waterproof is also easy to sew on standard sewing machine, so bespoke made to measure items can be structured without fuss. When the fabric gets a bit muddy you can hand clean it with hot water and a drop of detergent, or put the whole piece in the washing machine but make sure its at 30 degrees or lower.

With a multitude of colours to choose from and a multitude of reasons to use it, 4 oz waterproof is a brilliant all-rounder when it comes to waterproofing. Over 20 colours to choose from. Deep tones to light shades and ultra-bright. Pick one or pick a set of colours to create your made to measure waterproof space. Priced at a very reasonable £3.99 per metre or £2.99 a metre if you are bulk buying a 100 metre roll or more. The width is 150 cm wide, plenty to work with for all sorts of projects.

- Large colour choice
- Lightweight and strong
- Tough and durable
- Outdoor and indoor splashproof
- Industrial use PU fabric
- Outdoor craft fabric
