Selected Colour: Terracotta

Width: 150cm

Price: £6.99/mtr

Bulk Purchase:

Roll Length: 50 mtrs

Roll Price: 6.49/mtr

Description:

Coarsely woven jute hessian fabric, with all the attributes of classic hessian, strength, durability, environmentally friendly and colourful too! The rough jute fibres create a close weave, but not close enough to be entirely opaque, as with all hessian you will be able to see any background behind it. We have seventeen solid dyed colours to choose from which visually blend well together by either contrasting or complementing each other. Call a member of our team to request a swatch card so you can see the colour choice for yourself.

Our range of coloured jute hessian is best suited for use around public spaces and for public events. Using fire retardant fabric will reassure you and fit with the health and safety standards for indoor and outdoor businesses.

This type of hessian is popular with arts and craft fairs and food and drink markets for the making of banners, table covers tents and separating booths. The fabric is not water proof but if you are sure of the sunshine, this fabric can make lovely awnings, fitted or loosely draped to give a bit of shade and a splash of colour in the garden. Indoors this fabric is useful for event designs for weddings and parties, its easy to cut and shape to put over tables or as wall coverings and area dividers.
