New Cerise

Product code: KBT4903-F60-B298
Selected Colour: **Light Green**
Width: 120cm
Price: £5.99/mtr

Description:

We have nineteen great shades for you to choose from in our coloured hessian range. Made jute to create a strong coarse weave this fabric still has all the durability of classic hessian, but with the added element of strong colour you can create striking arts and crafts or practical items for around the house.

Schools and collages regularly use this fabric for notice boards, prop designs and textiles classes as it's easy to practice beginners sewing techniques. Playgroup and infant classes use this coloured variation for craft play, it cuts easily and PVA glue dries clear on hessian so you can cover the fabric with anything from glitter to paint.

Large amounts of this airy and breathable fabric can be creatively and practically used for indoor or sheltered events. Draping and partitioning inside tents and marquees will give a design a rich colourful feel whilst the natural breathability of the fabric will keep the space airy. Our hessian colour range uses mid tones so you can go for contrasting or complimenting colours for your design and they will work well together, take a look at our coloured canvas and calico ranges to blend other similar fabrics with your designs.
