Description:

Soft pale pink or soft blue fleece with printed white hearts floating at random angles over the fabric. The perfectly shaped white hearts measure 4.5 cm and are spaced quite widely apart.

These muted shades look great for cosy dressing gowns and cuddly blankets for children and adults alike.

- soft muted shades
- heart motif
- soft fleece
- 100% polyester

Winter fleece fabrics are a popular choice for a wide range of items due to their soft and cosy feel. One type of fleece fabric is micro fleece, which is known for its warmth and lightweight properties. This makes it ideal for a variety of items such as apparel, clothing, athletic wear, throws, blankets, hoodies, hats, scarves, sweat shirts, jackets, outdoor clothing, baby blankets, sofa throws, pet clothing, pet bedding, and toys.

fleece fabric is made by bonding polyester fibres together, which creates a fabric that is both warm and lightweight. This makes it a great choice for items that need to be worn or used in cold weather, as it will help to keep the wearer or user warm without adding extra bulk or weight.

Another advantage of micro fleece fabric is its durability. It is resistant to pilling and has good abrasion

resistance, making it a good choice for items that will be frequently used or washed. Additionally, it dries quickly and is easy to care for, making it a convenient choice for everyday use.

In terms of apparel, micro fleece fabric is popular in making jackets, hoodies, and sweaters. It is also used to make outdoor clothing like gloves, hats, and scarves, as well as athletic wear like sweat shirts and pants. Micro fleece fabric is also great for making blankets, throws, and baby blankets. The fabric is also great for pet clothing, pet bedding and pet toys.

Overall, winter fleece fabrics like micro fleece are a popular choice due to their soft and cosy feel, warmth, and durability. They are ideal for a wide range of items, making them a versatile choice for cold weather gear.
